## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

#### DETAILED ACTION

1. Claims 14, 15, and 17 are allowed. Claim 2 has been canceled in applicant's amendment filed 17 May 2007. Claims 1 and 3-11 have been canceled in applicant's amendment filed 24 November 2008. Claims 12, 13, and 16 have been canceled in applicant's amendment filed 18 May 2009.

#### *Examiner's Amendment*

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Norman Soloway (Reg. # 24,315) on 29 July 2009.

The application has been amended as follows:

Claim 14 has been replaced with the following:

- 14. A reproduced signal equalizing method for optical information media in which reproduced signals obtained by irradiating laser light to an optical information medium are equalized so as to bring a waveform corresponding to the reproduced signals close to a waveform having predetermined characteristics, the method comprising the steps of:
- sampling the reproduced signals in a predetermined cycle;
  - inputting the reproduced signals sampled in the predetermined cycle to a Viterbi decoder, wherein the reproduced signals sampled in the predetermined cycle are unequalized;
  - demodulating by the Viterbi decoder the unequalized reproduced signals sampled in the predetermined cycle to generate binarized data;
  - defining a target waveform as a waveform based on the binarized data demodulated by the Viterbi decoder and a partial response waveform;

calculating an equalization coefficient for producing a smallest difference between the target waveform and the unequalized reproduced signals sampled in the predetermined cycle by a least square technique using a matrix calculation; and equalizing the unequalized reproduced signals sampled in the predetermined cycle by using the calculated equalization coefficient.--

In claim 15, line 1: "A reproduced signal equalizing method" has been changed to --The reproduced signal equalizing method--.

Claim 17 has been replaced with the following:

--17. A reproduced signal equalizing apparatus for equalizing reproduced signals obtained from optical information media by bringing a waveform corresponding to the reproduced signals close to a waveform having predetermined characteristics, the reproduced signal equalizing apparatus comprising:

an optical head which reproduces signals by irradiating laser light to an optical information medium;

an analog-to-digital (A/D) converter which samples the reproduced signals in a predetermined cycle;

a Viterbi decoder which demodulates the reproduced signals sampled in the predetermined cycle to generate binarized data, wherein the reproduced signals sampled in the predetermined cycle are unequalized;

a target waveform generator which generates a target waveform based on the binarized data demodulated by the Viterbi decoder and a partial response waveform;

an equalization coefficient calculator which calculates an equalization coefficient by producing a smallest difference between the target waveform and the unequalized reproduced signals sampled in the predetermined cycle using a

Art Unit: 2627

least square technique, wherein the least square technique includes including a matrix calculation; and  
an equalizer which equalizes the unequalized reproduced signals sampled in the predetermined cycle by using the calculated equalization coefficient.--

***Allowable Subject Matter***

3. Claims 14, 15, and 17 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art of record, either alone or in combination, fails to teach or fairly suggest, in claims 14 and 17, where a Viterbi decoder demodulates unequalized, sampled reproduced signals so that the demodulated signals can be used in defining a target waveform, determining an equalization coefficient based on the target waveform, and equalizing the unequalized, sampled reproduced signals using the equalization coefficient. Claim 15 is allowed based on it's dependency from claim 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Relevant Prior Art***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
  - a. Koizumi (US Patent 6,504,868) discloses an apparatus in which unequalized reproduced signals are input into a Viterbi decoder as part of an equalization process.
